PROFESSIONAL SUMMARY

Final-year ICT undergraduate at the University of Ruhuna (graduating 2027) who builds bilingual Sinhala and English software for real users. Built an offline-first Flutter app for gem miners as my final-year research, an information management system for the Southern Province Development Authority during my internship, and a Laravel CRM for insurance advisors with automated tests and CI. Several years as an insurance consultant at Arpico Insurance gave me strong requirements-gathering and client communication skills. Seeking a Software, Mobile or Web Developer role.

TECHNICAL SKILLS

Languages: Java, PHP, JavaScript, Dart, Python, C++, C#, SQL
Mobile: Flutter, Android Studio, Java (Android SDK), SQLite, SQLCipher, offline-first sync
Web: Laravel, React, Node.js, Express, Astro, Tailwind CSS, Alpine.js, HTML5, CSS3, REST APIs, PWA
Databases: MySQL, PostgreSQL, SQLite, Firebase Firestore
AI and Data: TensorFlow Lite, MobileNetV2, Teachable Machine, NLTK, scikit-learn (TF-IDF, cosine similarity)
Security: Authentication, two-factor login, JWT, bcrypt, encryption at rest, role-based access, audit logging
Tools and Practices: Git, GitHub, GitHub Actions (CI), PHPUnit, Docker, OOP, SDLC, Agile, VS Code

EXPERIENCE

Software Development Intern, Southern Province Development Authority (Department of Finance) 2026
Sri Lanka

- Built the Authority's bilingual (Sinhala and English) Information Management System for registering entrepreneurs and tracking their applications across districts.
- Developed a React 19 and Vite front end with Tailwind CSS and Recharts dashboards, backed by a PHP API and a PostgreSQL database.
- Implemented record management with district, DS and GN division filters, NIC validation, bulk actions, a recycle bin, Excel import and Excel/PDF export.
- Added secure login with account lockout, email password reset, an activity log and scheduled database backups.

Insurance Consultant, Arpico Insurance Several years
Sri Lanka

- Advised clients on life, health and motor insurance, assessed their needs and recommended suitable cover, consistently meeting sales targets.
- Built long-term client relationships; this field experience directly shaped the Rakawarana CRM for insurance advisors.

PROJECTS

SmartGem – Final-Year Research Project (University of Ruhuna) 2026
Flutter, Dart, SQLCipher, Node.js, Express, MySQL 8, JWT, TensorFlow Lite
Link: Project page

- Offline-first Sinhala and English mobile app that helps small-scale gem miners in Uva Province value stones, share partner profits and keep NGJA licences valid.
- Built partner profit sharing, NGJA licence tracking with notifications and email reminders, a licence fee calculator and a 54-gem bilingual library.
- AES-256 encrypted local database with the key in Android Keystore; background sync to a JWT-protected Node.js API; on-device MobileNetV2 gem identification in progress.
- Sole researcher and developer using Design Science Research; supervised by Mr. Waruna Gamage.

Rakawarana – Bilingual CRM for Insurance Advisors 2026
Laravel 13, PHP 8.3, Tailwind CSS 4, Alpine.js, PHPUnit, GitHub Actions, Docker
Link: Project page

- Tracks clients, policies, premium due dates and renewals with one-tap Sinhala and English WhatsApp reminders and monthly target reports.

- Two-factor login, encrypted NIC numbers, per-advisor data isolation, rate limiting, security headers and an audit log; feature tests run on every push.

Viyadam Pota – Bilingual Expense Tracker (live) 2026

JavaScript, *Firebase Authentication*, *Cloud Firestore*, *PWA*, *Tesseract.js*

Link: Live app | Source code

- Installable offline web app with weekly and monthly summaries, shared family books, budgets and on-device receipt scanning; secured with Firestore rules.

AgriAid – Crop Disease Assistant 2026

Python, *Flask*, *TensorFlow.js*, *Teachable Machine*, *Gemini API*, *SQLite*

Link: github.com/malingaprabhath7-maker/AgriAid

- Farmers upload a leaf photo to identify crop diseases and receive Sinhala and English treatment advice, with an AI chat assistant and scan history.

FAQ Chatbot and AI Language Translation Tool (internships) 2026

Python, *Streamlit*, *NLTK*, *scikit-learn*, *Gradio*

Link: FAQ Chatbot | Translation Tool

- NLP chatbot that matches questions to FAQs with TF-IDF and cosine similarity; real-time translator for 15+ languages including Sinhala and Tamil.

Other projects

- Calm Desk – bilingual stress-care web app with the PSS-10 stress check and relief exercises (live).
- Travel Lanka – bilingual Sri Lanka tour booking site built with Astro (live).
- Ceyloncraft – bilingual craft store with WhatsApp checkout and a Firebase admin panel (live demo).
- EduBridge, a web-based school management system (research abstract at RASAS 2026), an IoT smoke detection and fire alarm system and a native Android app.

All projects: malingaprabhath7-maker.github.io/malinga-portfolio

PUBLICATIONS

Co-author. *"EduBridge: A Simplified Web-Based School Management System for Digital Transformation in Sri Lankan Schools."* Abstract, 11th Ruhuna Arts Students' Annual Sessions (RASAS 2026), Department of Information Technology, University of Ruhuna, 29 October 2026.

EDUCATION

BA (Hons) in Information and Communication Technology, University of Ruhuna 2023 – 2027 (expected)

- Coursework: Object-Oriented Programming, Web Technologies, Database Systems, Software Engineering, Computer Networks, Mobile Application Development, Internet of Things.

G.C.E. Advanced Level, Mo/ Okkampitiya Vijayabahu Senior Secondary School 2021

- Political Science A, Sinhala A, Agricultural Science C

G.C.E. Ordinary Level, Mo/ Okkampitiya Vijayabahu Senior Secondary School 2016

CERTIFICATIONS

- Web Design and Development for Beginners (12-week program), American Corner Matara, U.S. Embassy in Sri Lanka, 2026
- Cyber Security Foundations Course (12-week program), American Corner Matara, U.S. Embassy in Sri Lanka, 2026

LANGUAGES

Sinhala (native), English (professional working proficiency)
