PROFESSIONAL SUMMARY

Final-year ICT undergraduate and aspiring Software Developer with hands-on experience in Java programming, object-oriented design, Android application development, and full-stack web development. Proven track record of building functional, user-focused applications including a Learning Management System (LMS) and an IoT system. Skilled in the software development lifecycle (SDLC), database integration, and version control using Git/GitHub. Seeking a Software Developer, Android Developer, or Web Developer role to contribute effectively to real-world projects and grow within a dynamic engineering team.

TECHNICAL SKILLS

- Programming Languages: Java, Python, JavaScript, C++, C#
- Web Development: HTML5, CSS3, Responsive Web Design, Gradio, Streamlit
- Machine Learning / NLP: NLTK, Scikit-learn, TF-IDF, Cosine Similarity
- Mobile Development: Android Studio, Java (Android SDK), Mobile UI/UX Design
- Software Engineering: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), System Design, Database Integration
- IoT Development: Sensor Integration, Hardware-Software Interfacing, Real-Time Monitoring Systems
- Cybersecurity: Network Security Fundamentals, Threat Awareness
- Tools & Platforms: Git, GitHub, VS Code, Android Studio
- Core Competencies: Problem-Solving, Team Collaboration, Client Communication, Time Management

PROJECTS

FAQ Chatbot | Python, Streamlit, NLTK, Scikit-learn (TF-IDF & Cosine Similarity) | github.com/malingaprabhath7-maker/CodeAlpha_FAQ_Chatbot

- Built an interactive conversational chatbot designed to process user inquiries and automatically retrieve matching FAQs using NLP preprocessing and TF-IDF similarity algorithms.
- Developed a feature-rich Streamlit application with custom threshold controls, dynamic UI themes, and confidence score displays.

AI Language Translation Tool | Python, Gradio, Deep-Translator, CSS, Git | github.com/malingaprabhath7-maker/CodeAlpha_Task1

- Developed a responsive multi-language translation web application supporting 15+ languages (including Sinhala, English, Tamil, Japanese, etc.) with real-time text translation capabilities.
- Built an intuitive, Google-Translate-inspired UI featuring live character counting, dynamic language swapping, and instant auto-translation as users type.

Stress Management System — for IT Professionals | HTML5, CSS3, JavaScript (client-side, localStorage) | github.com/malingaprabhath7-maker/Stress-Management-

- Built a fully client-side stress management web app with login/registration, a 10-question stress assessment (Low/Moderate/High/Severe scoring), and personalized relief recommendations.
- Implemented relief mini-games (breathing exercise, Bubble Pop, Mind Sweep) with before/after stress tracking, plus a daily check-in log with streaks, trend charts, and CSV export.

Travel Lanka — Tourism Static Site | HTML, CSS, JavaScript | github.com/malingaprabhath7-maker/tourism-static

- Rebuilt a PHP + MySQL tourism booking site as a fully static, database-free version deployable to Vercel/Netlify, with home, package detail, gallery, about, and contact pages.
- Converted server-rendered package data and booking logic into client-side JavaScript modules, preserving core functionality without a backend.

AgriAid — Web-Based Farming & Agriculture Management Platform | HTML, CSS, JavaScript | github.com/malingaprabhath7-maker/AgriAid

- Developed a web application frontend for crop management and tracking, including secure login/profile access and an interactive farming dashboard with daily agricultural checklists.

Echomood — Aesthetic Web Platform | HTML5, CSS3, JavaScript (ES6) | github.com/malingaprabhath7-maker/Echomood-web

- Built a lightweight, fully responsive content platform with a dynamic tab/category filtering system, custom CSS animations, and a dark aesthetic theme for showcasing curated multimedia content.

Ceyloncraft | Web-Based Marketplace | github.com/malingaprabhath7-maker/Ceyloncraft

- Built a web-based marketplace concept for traditional Sri Lankan crafts (Kandyan Batik, masks, pottery, brassware), connecting rural master artisans directly with buyers.

Android Mobile Application | Course Project — Applications Development for Mobile Environments

- Designed and developed a native Android application using Java and Android Studio, applying object-oriented programming principles.
- Implemented core application features and built a functional, user-friendly mobile interface following mobile UI/UX best practices.

EduBridge — School Learning Management System | Mini Project

- Designed and developed a full-stack Learning Management System (LMS) to streamline school academic administration.
- Built features for student and teacher management, course content delivery, and assignment tracking.
- Gained practical experience in system design, database integration, and the software development life cycle (SDLC).

Smoke Sensor and Fire Alarm System | Internet of Things (IoT) Course Project

- Developed an IoT-based smoke detection and fire alarm system, integrating hardware sensors with software-driven control logic.
- Implemented real-time monitoring and automated alert mechanisms to demonstrate practical IoT application development.

Personal Software Development Portfolio | github.com/malingaprabhath7

- Maintain a portfolio of personal repositories showcasing proficiency in Java, HTML, CSS, and web development.
- Continuously build coding skills through independent projects and version control practice using Git and GitHub.

WORK EXPERIENCE

Insurance Consultant | Arpico Insurance, Sri Lanka — *Multiple Years*

- Advised clients on insurance products, assessed individual needs, and recommended suitable coverage plans.
- Built strong communication, negotiation, and client relationship management skills, consistently meeting sales targets through trust and long-term rapport with a diverse client base.
- Developed transferable skills in requirements gathering, stakeholder communication, and problem-solving, directly applicable to client-facing software development roles.

EDUCATION

Bachelor of Arts (Hons) in Information Communication Technology | University of Ruhuna, Faculty of Humanities and Social Sciences — *Expected Graduation 2027*

Relevant Coursework: Object-Oriented Programming, Web Technologies, Database Systems, Software Engineering, Computer Networks, Applications Development for Mobile Environments, Internet of Things (IoT)

G.C.E. Advanced Level | Mo/ Okkampitiya Vijayabahu Senior Secondary School — *2021*

Political Science – A, Sinhala – A, Agriculture Science – C

G.C.E. Ordinary Level | Mo/ Okkampitiya Vijayabahu Senior Secondary School — *2016*

Results: 1A, 2B, 1C, 5S

CERTIFICATIONS

- Web Development — American Corner (Certified Short Course)
- Cybersecurity Fundamentals — American Corner (Certified Short Course)
